

Kathy Fisher Featured on Upcoming Episode of “Inside Drag Racing” From NHRA Thunder Nationals

LIMA, Ohio – A last minute schedule addition, of the NHRA Thunder Valley Nationals for Performance by Fisher Racing, would put team driver Kathy Fisher and her Dragon Racing Fuels/K&N/Ohio Crankshaft/Amalie Oil Super Comp Dragster in front of the cameras for “Inside Drag Racing”.

“The Bristol event was just something that came together very quickly for us,” explained Kathy. “Since we have two team cars, my Super Comp and my husband Kevin’s Top Dragster, we try to only go to events where we can compete with both. Top Dragster wasn’t offered during that event, but it didn’t take much convincing to get Kevin to go and just take my car.”

The trip to the famed Bristol Dragway, nestled between two mountains adjacent to Bristol Motor Speedway, was a first for The Fisher’s.

“One of the reasons we went was just to see the track,” she continued. “Bristol has always been on our list of places we must race and we were not disappointed in the least with the breathtaking views and the outstanding facility.”

When Ted Jones, of Bristol, Tennessee based Masters Entertainment, became aware of Fisher’s trip to the NHRA National event, he asked her to be a part of a special sportsman episode of “Inside Drag Racing” which airs nationally on Fox Sports.

“Inside Drag Racing” is a highly successful drag racing TV magazine show currently in its 16th year. The program has received multiple broadcasting awards and covers numerous drag racing events from various sanctioning bodies all across the U.S. The series can be seen Sunday mornings at 11:30a and repeats Mondays at 4:30p, in all time zones.

Fisher, a National and Divisional event winner in the 8.90 category, was joined by fellow sportsman competitor Skip Walls and his Lokar Motorsports Super Comp car for the show’s taping during the Bristol event.

“Our Super Comp class is one of the very popular index classes contested by NHRA (National Hot Rod Association) on both the National and Divisional level,” noted Fisher. “This class has an 8.90 second quarter mile index, which makes it a breakout class and one where most all of us are

using throttle stops to slow the cars down time-wise, while still holding on to higher mile-per-hour, ranging from as low as 150's to well into the 180's. But we all must stay at or slower than the 8.90 index."

"It can be quite complicated class to explain and I hope that what the viewers will witness during our show, will help them better understand all that is involved with not only competing in these index classes, but also at this level of our sport," she added.

Fisher is no stranger to the camera and has hosted various shows on ESPN, Fox Sports and The Outdoor Channel, but notes that being on the "other side" as she put it was quite different.

"Even though I do a little work in the television broadcast field, I thought it may be a little distracting to have all the cameras on my car and around us during and after my runs," she reflected. "But to be honest, I didn't notice them at all. It was an outstanding experience all the way around and we look forward to seeing the show next month."

The special episode of "Inside Drag Racing," filmed with Fisher and her Dragon Racing Fuels/K&N/Ohio Crankshaft/Amalie Oil Super Comp Dragster at Bristol Dragway during the NHRA Thunder Valley Nationals, will air on Fox Sports Sunday July 11th at 11:30a and repeat Monday July 12th at 4:30p.
